Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(e) as being anticipated by Law et al. (6,383,031).

In regard to claim 1, Law et al. discloses an electrical connector, comprising a housing body 20 having a tubular plugging face 32 for plugging to a mating connector 22, the tubular plugging face 32 including a square tubular portion (see attached drawing) having a rectangular section (see attached drawing) in a plane perpendicular to the plugging direction and a cylindrical portion having a circular section (see attached drawing) in the plane, the circular section having a diameter greater than a height of but smaller than a width of the rectangular section and overlapping a central portion of the rectangular section in the plane; and at least one key groove (see attached drawing) provided in the cylindrical portion.

In regard to claim 2, Law et al. discloses that the tubular plugging face 32 includes at least one additional key groove 46 provided in the square tubular portion.

In regard to claim 3, Law et al. discloses that the electrical connector is a plug connector having a plugging projection section 26, the tubular plugging face 32 provided in an outer surface of the plugging projection section 26, and the key groove provided in an outer surface of the cylindrical portion.

In regard to claim 5, Law et al. discloses that the cylindrical portion accommodates a coaxial terminal 84 which is concentric with the cylindrical portion.

Allowable Subject Matter

3. Claims 4 and 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: In regard to claim 4, the prior art fails to provide, teach or suggest the electrical connector is a receptacle connector having a plugging cavity section, the tubular plugging face provided on an inner surface of the plugging cavity section, the key provided in an inner surface of the cylindrical portion. In regard to claim 6, the prior art fails to provide, teach or suggest the coaxial terminal comprises a cylindrical outer conductor and a projection extending in a plugging direction of the outer conductor, wherein a groove for receiving the projection is provided in a coaxial terminal

of the mating connector. In regard to claim 7, the prior art fails to provide, teach or suggest the receptacle connector comprises a flexible lock arm provided outside a region of the cylindrical portion but inside a region of the square tubular portion, extending in the plugging direction, and having a lock engagement claw at a top end thereof.

Response to Arguments

5. Applicant's arguments with respect to claims 1-3 and 5 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
